**COOLANT PRE-MIXED RADIATOR FLUID - Quick Smart Products**  
The coolant comes pre-mixed with 50 per cent water and 50 per cent coolant. The fluid can stay intact for up to -34 degrees which is suitable even in the coldest areas around the world. This liquid also helps to fight particles in your car's radiator and prevents corrosion inside it.

**The Best Engine Antifreeze & Coolants in 2020 - Review**  
extended-life-pre-mixed-coolant... XPS Antifreeze/Coolant contains the correct dilution and the necessary additives to prevent corrosion and inhibit cavitation in BRP cooling systems. Long-life, 5-year formula specially formulated for BRP vehicles. Superior heat transfer.

**Extended Life Pre-mixed Coolant | Maintenance | Can-Am**  
Radiator coolant, sometimes called antifreeze, is the green, yellow, or orangish liquid that fills your car's radiator. The coolant in your radiator is a 50/50 mixture of commercial coolant and water, and together this solution makes a liquid that helps cool your engine by circulating through the cooling system.

**Shelf Life of Car Radiator Coolant Fluid and Antifreeze**  
A typical cooling system is going to require between 2 and 3 gallons, so if you do buy the pre-mixed, it's best to buy 3 gallons of it. If you don't mind mixing it yourself, buy two gallons of coolant, and two gallons of distilled water, and you'll actually save a little money.

**What Coolant Color Should I Use In A Champion Radiator?**  
Prestone HD 50/50 Prediluted NITRITE FREE Extended Life (ELC) is a blend of antifreeze/coolant concentrate and demineralized water designed to provide up to 600,000 miles / 12,000 hours\*\* of protection.

**Best OE Engine Coolant for Honda Cars, Trucks & SUVs**  
there are two types of coolant: a type A and type B coolant. Generally for car's pre 1985 you can run a type b coolant (this is pretty much a straight corrosion inhibitor. Type A is an anti freeze anti boil rust inhibitor. There is a big price difference between the two.

**Concentrated vs PreMixed Radiator Fluid - Toymods Car Club**  
Antifreeze, Radiator Additives and Windshield Wash Fluid ... When water freezes, it expands, so without the fluid, this expansion can cause your engine block to crack and ruin your motor. Most vehicles require a 50/50 ratio of water to antifreeze, but if you live in a warmer climate, you can use a greater percentage of water and less antifreeze

**Best Antifreeze for Cars, Trucks & SUVs - AutoZone.com**  
Loosen the reservoir cap just a little and step back a bit as the pressure releases just in case. Then, remove the cap completely. If the coolant level is low, add the correct coolant to the reservoir (not the radiator itself). You can use diluted coolant by itself, or a 50/50 mixture of concentrated coolant and distilled water.

**Antifreeze & Coolants - Walmart.com**  
Engine coolant is a mix of ethylene glycol and water. Nearly all engines use a 1:1 ratio of coolant: water. One thing to bear in mind with modern coolant: The jugs you buy at the store are pre-diluted. In the past, coolant was sold as a pure substance that you would have to dilute with water at home before you put it in your car.

**Understanding the Different Antifreeze Types for Your Car ...**  
Coolant (either ethylene glycol or propylene glycol) is diluted (usually 50/50 with distilled water) antifreeze. It is used for several purposes in your vehicle. As the antifreeze name would describe, in winter it stops the water from freezing. In the summertime, it also helps to dissipate some of the heat from your engine to avoid overheating.

**Coolant Basics. Can You Mix Different Types?**  
It can be mixed with any product - As Bruce touched on above, Prestone is safe to use with all types of coolant, so you can top up the reservoir without flushing the radiator. It provides unbeatable protection - Prestone is stress-tested in extremes, from lows of -37°C to highs of +129°C, so you can be confident your car is always protected.

**Why Is Coolant Different Colours? | Prestone**  
Genuine Toyota Super Long Life Antifreeze/Coolant is a new generation ethylene glycol based coolant which is pre-diluted 50:50 with de-ionized water for freeze protection to -34°F. Non-silicate, non-amine, non-nitrite and non-borate coolant formulated with long-life hybrid organic acid technology.

**Amazon.com: F122 Coolant**  
Antifreeze is added to the water in your engine's cooling system that lowers its freezing point (and raises its boiling point too). It's why the liquid in your radiator doesn't freeze when everything else seems to be! You can choose a concentrated coolant that needs to be mixed with water or a ready-mixed one that can be used immediately.

**Antifreeze | Engine Coolant | Car Coolant | Halfords UK**  
As the product states, this coolant is used by Mercedes on all their vehicles. Some of the reasons to buy. 1) This is a 50/50 solution, so it is pre-mixed, no need to add water. Just pour into your coolant reservoir. 2) Recommended by Mercedes as their choice of coolant 3) The price is cheaper than the local retail store.
