No manual focus: You don't have much to focus with a lens that covers a 170-degree angle of view. Just about anything in the scene is in focus as long as it's more than a few inches away (see the figure). The GoPro isn't a point-and-shoot camera. Although the camera's manual controls are somewhat limited, it's more than a point-and-shoot.

You can contact gopro support and the issue will be covered by warranty or you can also see if the lens can be rotated to re-adjust focus yourself. The lens is meant to be glued in to its preset focul point but some may be loose allowing rotation which I think is not a bad thing giving you options to manual focus for some cool close up shots.
