Honda GX390 Engine Parts

First Induction - piston travels down the cylinder and draws air/fuel mix in through the open inlet valve.. Second Compression - the piston starts to travel back up the cylinder and closing the inlet valve, creates a sealed, air/fuel compressed cylinder.. Third Power - The piston is now at the top dead center (TDC) and starting to turn back down the cylinder.

Engine Kicks Back when Starting | Lawnmowerfixed

Wondered if anyone has ever come across this problem before. Just acquired a Honda GX390 13HP engine, bought it blind so expected to find something wrong. On pulling the starter rope the engine reaches the compression stroke but won't turn over the compression stroke.

Honda GX390 engine issues | Pitchcare

it is a honda gc 190 engine on a cub cadet tiller by Manage My Life. April 1st, 2012. Comment . 0 votes Thank you for your question. I am sorry you are having a problem with the tiller. Usually when an engine kicks back that hard, it is because the valves are out of adjustment. The engine has a compression release that aids in starting the engine.

when pulling start cord it jerks back so hard almost break ...

Engine has violent kick back on pull start rope

I have a Honda HRR2169vya mower with a GCV160 engine. Lately it has started kicking back when I attempt to start it. It seems to be getting worse and nearly broke my arm earlier this week. Typically, I see this when the timing is off, possibly due to a slipped or broken flywheel key. I pulled...
