Leibniz also discovered the binary number system and invented the first calculating machine that could add, subtract, multiply, and divide. When it came to metaphysics, he formulated the famous monads theory, which explained the relation between the soul and the body. Leibniz is often known as the founder of symbolic logic.

followed a "pre-established harmony." He extended the work of his mentor Huygens from kinematics to include dynamics.

Leibniz, Gottfried (1646-1716) -- from Eric Weisstein's ...
Introduction Gottfried Wilhelm Leibniz (b. 1646–d. 1716) was one of the greatest of the early modern “rationalist” philosophers. He is perhaps best known to students of philosophy as an advocate of the principle of sufficient reason, the preestablished harmony of mind and body, philosophical optimism, and the doctrine of monads.

Gottfried Wilhelm Leibniz - Philosophy - Oxford Bibliographies

And this definition seemed to us perfectly suitable for Leibniz who, in fact, in an apparently fundamentally rationalist philosophy, is engaged in a kind of exuberant creation of unusual concepts of which there are few such examples in the
