Mechanic Study Guide Brakes Braking

Automotive brakes are designed to slow and stop a vehicle by transforming kinetic energy(motion energy) into heat energy. As the brake linings contact the drums/rotors they create friction which produces the heat energy. The intensity of the heat is proportional to the vehicle speed, the weight of the vehicle, and the quickness of the stop.

MECHANIC STUDY GUIDE Brakes & Braking Systems Automobile & Light Truck Repair Listed below are a number of items and subjects which make up the mechanic certification test identified above. An individual's ability to pass the certification test will depend upon the amount of knowledge the person has concerning these items.

Mechanic Study Guide Brakes Braking Systems

1. Answer A is wrong. The pressure differential switch warns the driver of a possible hydraulic leak in the system. Answer B is correct. The metering valve delays hydraulic pressure to the front brakes and gives the system a chance to overcome rear drum spring tension. The metering valve helps achieve balanced braking.
